ABOUT ME

Hello, I am Jelaletdin. I have been working in the software industry for over 2.5 years as a web developer. I describe myself as innovative, solution-oriented and a team player. I enjoy working on complex projects with my ability to balance between front-end and back-end technologies and my ability to learn quickly. I trust my collaboration and communication skills and love working with my teammates. I ensure to the successful completion of projects with my creative and solution-oriented approaches while addressing problems in project processes. I am excited to contribute to unique projects in an innovative company and take advantage of continuous learning and development opportunities.

JOB EXPERIENCE

FRONT-END DEVELOPER

01.06.2024 - 01.03.2025

Jussplay.dev/ Ashgabat

Front-End developer at Jussplay.dev, where I contributed to the development of the websites 'jussplay.dev' and 'SkySystems'. I worked on the front-end using React, focusing on key components and features.

JUNIOR WEB DEVELOPER

22.11.2023 - 20.03.2024

Sanly.pro/ Ashgabat

I worked as an intern at Sanly.pro, where I wrote the websites 'Abrayly Rysgal' and 'Sanly.pro'. I wrote the front-end and back-end both of these websites myself, using Vue3 for the front-end and Django for the backend.

GRAPHIC DESIGNER

05.11.2023 - 21.11.2023

Sanly.pro/ Ashgabat

During the process I worked here Sanly.pro has its own web site 'Ashgabat.market' where I adapted the pictures of the products according to website. I used Adobe Photoshop for that.

FRONT-END DEVELOPER

01.11.2024

Gerekli Hyzmat HK/ Ashgabat (TmCars)

I developed two test projects, Task Management and Inventory Management, focusing on creating efficient and user-friendly interfaces. Utilized React and Ant Design to implement core components and features, ensuring responsiveness and functionality. Gained hands-on experience in building scalable front-end solutions while collaborating with the team. And integrated WebSocket for real-time chat functionality, enabling seamless communication between users.

FREELANCE WORKS

Tonlike Landing Page

Designed and developed a dynamic landing page using React JSX and Tailwind CSS, combining modern design with responsive functionality. Integrated with Google Sheets to store form submissions in real-time, offering a seamless data management solution. Focused on delivering a clean, user-friendly interface, ensuring smooth interactions across all devices. Utilized Tailwind CSS for rapid styling and customization, achieving a high-performance, visually appealing layout.

WEB ULGAM [CONTRACT]

MM Electronics

Developed the entire frontend architecture for mm.com.tm, a full-scale e-commerce platform tailored for the Turkmenistan market. Utilized React.js, Redux Toolkit (RTK) for state management, and Ant Design for a sleek, modern UI. Built responsive components, category-based product listings, user authentication flows, and dynamic filtering/search interfaces. Focused on performance optimization and intuitive user experience, while ensuring seamless API integration with the backend services.
